Finish Guide:

- 000 = GROHE StarLight® Chrome
- P00 = Matte Chrome
- SD0 = GROHE RealSteel® Stainless Steel
- SH0 = Alpine White
The GROHE Rapid SL offers the complete solution to a wall hung toilet. Just choose a toilet bowl according to your personal taste and bring the design and comfort of your bathroom to a new level.

**Rapid SL Flushing System**

*Designed for easy installation of wall hung toilets*

**QUICK AND SIMPLE INSTALLATION**

GROHE provides all the necessary components to mount a wall hung toilet including a detailed instruction manual. All required adjustments of the frame can be done at the front of the carrier to accommodate accessibility needs. Automatic frame fixation allows installation by one person. Thanks to GROHE QuickFix, it takes an average of 30 minutes for one person to mount the frame and make all the necessary connections. No tools are required to make the connections. The pneumatic flush actuation button is constructed to be error-proof.

**ROBUST AND RELIABLE**

Grohe Safety provides the utmost level of security. A certified load bearing capacity and stability of the carrier has been confirmed at 880 lb (400 kg).

**FLEXIBLE PLACEMENT**

Rapid SL can be mounted in front of solid walls, or in front of stud walls or freestanding walls. This allows the freedom for multiple design layouts and the most effective use of bathroom space.

**SIMPLE MAINTENANCE**

If any maintenance is required, the actuation plate is easily removed exposing the internal components. The opening behind the plate is large enough to allow direct access to the flush and discharge valve which are constructed so that they can be easily removed for any necessary maintenance.

**LOW NOISE LEVEL**

Since the Rapid SL is a concealed system, noise is considerably decreased in comparison to a traditional toilet. In addition, Grohe Whisper® technology provides low-noise fittings and the pneumatic actuator further reduces noise.

**EASE OF USE**

Pushing the actuation button is virtually effortless.

**HYGIENE AND COMFORT**

A traditional toilet can make cleaning difficult. A wall hung toilet mounted to a Rapid SL carrier does not touch the floor. It’s a more hygienic solution and cleaning becomes easy, fast, and effective.

---

**GROHE SpareFlush**

The dual flush actuator enables the user to conserve water. The unit can provide either 0.8 gallons (3 l) or 1.6 gallons (6 l) of water.

---

**GROHE ToolFree**

No tools required for the installation of the water supply in the flushing cistern.

---

**GROHE VarioPort**

The water supply can be provided through four possible entry points: left, right, top or rear allowing the installer greater flexibility.

---

**GROHE QuickFix**

Timesaving installation which allows easy height adjustments of the bowl to avoid any hard to reach areas for maintenance. The large access panel allows easy access to all interior components.

---

**GROHE LoadPort**

The water supply can be provided through four possible entry points: left, right, top or rear allowing the installer greater flexibility.

---

**GROHE TostoFix**

No box required for the installation of the water supply in the flushing cistern.

---

**GROHE ToolFix**

No tools required for the installation of the water supply in the flushing cistern.

---

**GROHE Safety**

Certified load bearing capacity of 880 lb (400 kg) for wall hung toilets installed on the Rapid SL.

---

**GROHE SilentFix**

The dual flush actuator enables the user to conserve water. The unit can provide either 0.8 gallons (3 l) or 1.6 gallons (6 l) of water.

Actuation Plates for Dual Flush – Start/Stop

The universal discharge valves give the user the choice between a single or dual flush. This flexibility is provided by a clever pneumatic system that offers easy operation and very simple installation.

Grohe actuation plates are pleasantly small measuring only 6 1/8” by 7 3/4”.

GROHE StarLight®

The high-quality finish provides a striking chrome gloss with long-lasting brilliance and high resistance.

GROHE EcoButton

Activation of the Eco button releases a smaller quantity of water, 0.8 g (3 l) and reduces water consumption by more than 50%.

GROHE EasyConnect

The actuation button is connected to the AV1 flush valve by a pneumatic hose. The connection is straightforward and allows for simple maintenance if required.
